PHASE I ENVIRONMENTAL SITE ASSESSMENT

AT

S-130 (BOYKIN ROAD)

CAMDEN, SOUTH CAROLINA

I) SUMMARY

In December 2010, January 2011, and February 2011 Hussey, Gay, Bell, and DeYoung Environmental, Inc. (HGBD) performed a Phase I Environmental Site Assessment (Phase I ESA) for an approximately 1.6 mile corridor along S-130 (Boykin Road) located in Camden, South Carolina (Figure 1, Appendix I).

- The results of this Phase I ESA have revealed no current recognized environmental condition associated with the property.
- The results of this Phase I ESA have revealed no historical recognized environmental conditions associated with the property.
- The results of this Phase I ESA have revealed no *de minimis* conditions associated with the property.
- In our professional opinion, no additional investigation is required to detect the presence of hazardous substances or petroleum products at the subject property.

Except for the limitations and exceptions discussed in Sections VI.A and VIII, this Phase I ESA was completed in general accordance with American Society for Testing and Materials (ASTM) Standard E1527-05. The methods employed for this Phase I ESA included examination of available background materials, file review, interviews, and field inspections.

This document was prepared in accordance with standard and appropriate methods employed in conducting an assessment. However, these methods may not have exposed all potential environmental threats to the project area. Conclusions presented apply to the site conditions observed at the time of the investigation and to those which may potentially impact the site in the future. The conclusions are not applicable to changes occurring after the investigation has been completed and of which HGBD is not aware and cannot evaluate.

II) INTRODUCTION

A) PURPOSE

Consistent with the ASTM Standard E1527-05, the principal objective of this Phase I ESA is to determine the potential for the presence of hazardous substances, petroleum products, or other environmental hazards at the subject property that could affect future development at the site. Release of materials into structures, soils, groundwater, and/or surface water may occur as a result of treatment, storage, disposal, generation, utilization, transport, or distribution operations. This study considers past, present, and possible future threats of environmental contamination due to these activities.

B) SCOPE-OF-SERVICES

This site assessment was performed in general accordance with ASTM Standard E1527-05 and the following summarizes the approach. Existing information pertaining to the site was obtained from a variety of sources. Interviews were conducted as appropriate with present and former site owners, managers, and occupants as well as with government officials (Appendix VI). Physical aspects of the vicinity were ascertained by examination of the United States Geological Survey (USGS) 7.5 minute topographic maps for Camden North and Rabon Crossroads, South Carolina dated 1935 and 1988, Federal Emergency Management Agency (FEMA) Flood Insurance Rate Maps (FIRM) revised dated December 19, 2006, and the U.S. Department of Agriculture Natural Resource Conservation Service (USDA-NRCS), Web Soil Survey of Kershaw County, South Carolina (Appendix V). Aerial photographs of the property dated 1938, 1964, 1982, 1994, 2005, 2009 and 2010 were reviewed from Environmental First Search, Inc. and from Google Earth to determine past uses of the subject site and vicinity. The aerial photographs are provided in Appendix II. Various regulatory databases recording the presence and/or release of hazardous substances and petroleum products within a 1/2 to 1 mile radius of the site were reviewed through Environmental First Search, Inc. (Appendix IV) and further inquiry was conducted as

appropriate.

A reconnaissance of the subject property and site vicinity was performed on December 9, 2010 to confirm land use patterns and physical features, and to record any observations which suggest potential adverse environmental impacts. If present, storage containers, including drums, barrels, and above or below ground tanks, were noted and investigated to the extent possible. If present, pits, ponds, lagoons, or other pools of liquid which may contain hazardous waste were examined, as well as any debris deposited at the site. Any physical signs suggesting a release, such as unusual odors, stressed vegetation, and stained soil or pavement were also noted and documented if observed. Observations were documented in the field with written notes and photographs.

C) SIGNIFICANT ASSUMPTIONS

While this report provides an overview of potential environmental concerns, both past and present, the Phase I ESA is limited by the availability of information at the time of the assessment. It is assumed that all information provided by outside parties was provided in good faith and is true and accurate. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

III) SITE DESCRIPTION

A) LOCATION AND LEGAL DESCRIPTION

The subject alignment is located in Kershaw County, Camden, South Carolina (Figure 1). The subject corridor is defined to be a 120 feet wide section (60 feet from the centerline in both directions) of an approximately 1.6 mile segment of S-130 (Boykin Road) beginning at Knights Hill Road and ending at US Highway 521 (North Broad Street).

B) SITE AND VICINITY CHARACTERISTICS

The subject corridor is primarily asphalt paved roadway (Photos 1 and 2). Areas adjacent to the paved section are primarily wooded, residential, or institutional. The subject corridor is primarily undeveloped west of the SC-97 (Liberty Hill Road) intersection (Photos 3 and 4). East of the Liberty Hill Road intersection, Boykin Road is bound to the south by residential development (Photos 5 and 6) and is undeveloped to the north of Boykin Road with the exception of two churches (Photos 7 and 8). The topography of the subject alignment is primarily flat with rolling hills, although there are some steep drop-offs and cuts (Photo 2 and 3). Vegetation at the subject site includes grasses, hardwoods, pine trees and underbrush (Photo 9). Surface drainage appears to occur through roadside swales and overland flow.

The vicinity of the subject alignment is primarily wooded and undeveloped or residential with the exception a race track. The Springdale Racetrack is located to the southwest of the subject corridor. Residential subdivisions are under development to the north of the subject corridor and well established residential areas exist to the east. The surficial groundwater flow direction in the vicinity is generally northwest toward the lower lying areas associated with Camp Creek that flows into the Wateree River. It should be noted that the direction of groundwater flow can be altered locally by changes in surface topography and man-made modifications. Determination of the groundwater gradients would require potentiometric

measurements and is outside of the scope of this Phase I ESA.

C) STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SITE

Boykin Road is a two lane, asphalt paved roadway with earth and valley gutter shoulders. The roadway appears in the oldest aerial photograph obtained (1938). The subject alignment has three main intersections: S-28-35 (Knights Hill Road) at the beginning of the alignment, Liberty Hill Road, and US 501 Kershaw Highway (North Broad Street) at the end of the alignment. Structures adjacent to the roadway are primarily one story residential dwellings appearing in the aerial photographs in 1964.

D) CURRENT AND PAST USES OF THE PROPERTY

The USGS 7.5 minute topographic maps for Camden North and Rabon Crossroads, South Carolina depict the subject corridor being occupied by Boykin Road since at least 1938.

E) CURRENT AND PAST USES OF ADJOINING PROPERTY

In the 1938 aerial photograph, tree harvesting is evident to the north of Boykin Road. The Springdale Racetrack has also been in place since at least 1938 to the south of Boykin Road. The previously harvested area north of Boykin Road appears re-vegetated in the 1964 aerial. With the exception of the racetrack, a couple churches, and a recycling facility, development in the area is primarily residential. Residential development started on the eastern end of Boykin Road in the 1960's but has expanded to the north of Boykin Road since 1980's when a large pond was constructed for a subdivision. New residential development can also be seen in the northeastern portion of the 2009 aerial photograph.

IV) USER PROVIDED INFORMATION

A) TITLE RECORDS

An environmental title search was not reasonably ascertainable or practically reviewable for all the properties in the subject alignment. However, SCDOT has confirmed that all plan references are correct and the ownership instruments are in place for the existing ROW of S-130 (Boykin Road). The subject corridor is primarily considered part of SCDOT ROW.

B) ENVIRONMENTAL LIENS OR ACTIVITY AND USE LIMITATIONS

SCDOT is not aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law.

SCDOT is not aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place and/or have been filed or recorded in a registry.

C) SPECIALIZED KNOWLEDGE

SCDOT specialized knowledge of the subject site does not extend to environmental conditions within the corridor.

D) COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

The Advanced Project Planning Report (APPR), dated February 2009 and prepared by the SCDOT in partnership with the Santee-Lunches Council of Governments (SLCOG) contains

all information available to the SCDOT regarding the environmental conditions within the subject corridor. Relevant pages from the APPR are attached to the SCDOT interview in Appendix VI.

E) OWNER, PROPERTY MANAGER, AND OCCUPANT INFORMATION

The subject corridor is primarily considered part of SCDOT ROW.

F) REASON FOR PERFORMING PHASE I

The Phase I ESA was prepared by HGBD at the request of Client. This Phase I ESA was requested for the following reasons:

- To identify UST's or hazardous materials that may be encountered by the project.

G) OTHER

The APPR, dated February 2009 and prepared by the SCDOT in partnership with the SLCOG contains all information available to the SCDOT regarding the environmental conditions within the subject corridor. Relevant pages from the APPR are attached to the SCDOT interview in Appendix VI.

V) RECORDS REVIEW

A) STANDARD ENVIRONMENTAL RECORD SOURCE

We have performed a review of the ASTM required standard environmental databases published by state and federal regulatory agencies to determine if the site or nearby properties are listed as having a past or present record of actual or potential adverse environmental impacts or are under investigation for potential adverse environmental impacts.

The following regulatory databases were obtained from the U.S. Environmental Protection Agency (USEPA) and the South Carolina Department of Health and Environmental Control (SCDHEC) through Environmental First Search, Inc.:

Database	ASTM Search Distance	Actual Search Distance
Federal NPL	1-mile radius	1-mile radius
Federal Delisted NPL	0.5-mile radius	0.5-mile radius
Federal CERCLIS	0.5-mile radius	0.5-mile radius
Federal CERCLIS NFRAP	0.5-mile radius	0.5-mile radius
Federal RCRA CORRACTS	1-mile radius	1-mile radius
Federal RCRA Non-CORRACTS TSD	0.5-mile radius	0.5-mile radius
Federal RCRA generators	property & adjoining	0.25-mile radius
Federal IC/EC registries	property only	0.50-mile radius
Federal ERNS	property only	0.12-mile radius
State/Tribal HSI sites	1-mile radius	1.0-mile radius
State/Tribal landfill/solid waste sites	0.5-mile radius	0.5-mile radius
State/Tribal registered UST/AST sites	adjoining properties	0.25-mile radius
State/Tribal Leaking UST sites	0.5-mile radius	0.5-mile radius
State/Tribal IC registries	property only	0.25-mile radius
State/Tribal EC registries	property only	0.5-mile radius
State/Tribal Voluntary Cleanup sites	0.5-mile radius	0.5-mile radius
State/Tribal Brownfield sites	0.5-mile radius	0.5-mile radius

Note: Facilities outside of the ASTM minimum search distance are not discussed further unless they have been determined to pose a risk to the subject site by the Environmental Professional.

The database review includes sites in Postal Zip Code area 29020. The selected radii and proximity guidelines are in general accordance with ASTM guidelines. Review of selected regulatory databases identified no listed regulatory facilities within the ASTM specified radii of concern. The results of the regulatory database search are included in Appendix IV.

B) ADDITIONAL ENVIRONMENTAL RECORD SOURCES

We have performed a review of additional environmental databases published by state and federal regulatory agencies to determine if the site or nearby properties are listed as having a past or present record of actual or potential adverse environmental impacts or are under investigation for potential adverse environmental impacts.

The following additional regulatory databases were obtained from the USEPA and the SCEPD through Environmental First Search, Inc.:

Database	Search Distance
US Brownfields	0.50-mile radius
State Spills 90	0.12-mile radiuses

The additional database review includes sites in Postal Zip Code area 29020. Review of these databases identified no additional facilities or conditions of concern, as determined by the Environmental Professional. The results of the regulatory database search are included in Appendix IV.

A review of Sanborn Fire Insurance Maps availability indicates there are no maps available for the subject corridor (Appendix IV).

A review of the City of Camden Hill and Polk City Directories (1964, 1966, 1971, 1976, 1980, 1985, 1990, 1995, 2000, 2005, and 2010) indicated only residential dwellings in 1964

and 1966. The Seventh Day Adventist Church appears in the 1971 directory and the Seventh Day Adventist School is also listed in the 1985 directory. The Corner Stone Baptist Church first appears in the 1990 directory. A business reported as Palmetto Home Inspection Service is listed in the 2005 and 2010 directories. Addresses listed in subject corridor extend from 600 Boykin Road in the east to 807 Boykin Road in the west. All addresses listed are east of Liberty Hill Road. Please refer to Appendix IV.

C) PHYSICAL SETTING SOURCES

The USGS 7.5 minute topographic maps for Camden North and Rabon Crossroads, South Carolina dated 1935 and 1988 were examined for topographic and other features on the subject site. The ground surface of the subject property is depicted at approximately 250 to 280-feet in elevation. Elevations are in accordance with the National Geodetic Vertical Datum (NGVD) of 1929. Please refer to Appendix V.

A review of FEMA FIRM's for the subject site indicated that the subject site is located entirely outside of the 100 year flood zone within Zone X. Please refer to Appendix V.

The USDA-NRCS, Web Soil Survey of Kershaw County, South Carolina indicated Alpine Sand, Blanton Sand, and Wagram Sand as the major soil types within the subject corridor. Please refer to the map and description in Appendix V.

VI) SITE RECONNAISSANCE

A) METHODOLOGY AND LIMITING CONDITIONS

The subject property was inspected by John Eden and Elizabeth Penn-Sanders on December 9, 2010. All areas of the subject property were accessible at the time of the inspection. Visual inspection was conducted by driving the subject corridor and by walking areas inaccessible to vehicles. There were no visual or physical obstructions of the subject property. The weather during the inspection was overcast and windy.

The exterior of adjoining properties was visually evaluated for any recognized environmental concerns.

B) INTERIOR OBSERVATIONS

No interior inspections were performed.

C) EXTERIOR OBSERVATIONS

- 1) *Hazardous Substances and Petroleum Products in Connection with Identified Uses:* No hazardous materials were observed to be stored or used on the property in connection with identified uses.
- 2) *Storage Tanks:* Visual site inspection and the review of tank registration records are used to determine the possible existence of past and present storage tanks in the area of the subject property. It must be noted however, that the absence of certain site conditions or lack of records may restrict or prevent the determination of the number and contents of storage tanks on the subject property. No aboveground storage tanks were observed in the subject corridor. No UST's were observed in the subject

corridor.

- 3) *Odors:* No strong, pungent, or noxious odors were observed on the subject site.
- 4) *Pools of Liquid:* No standing water was observed within the subject corridor; No pits, ponds, or lagoons were observed on the property. Some wetland areas associated with Camp Creek are located to the north of Boykin Road.
- 5) *Drums:* No drums were observed.
- 6) *Hazardous Substances and Petroleum Products Containers:* No containers with hazardous materials or petroleum products that might represent a recognized environmental condition were observed on the property.
- 7) *Unidentified Substance Containers:* No open or damaged containers containing unidentified substances suspected of being hazardous substances or petroleum products were observed on the property.
- 8) *PCBs:* The past use of PCBs in electrical equipment such as transformers, fluorescent lamp ballasts, and capacitors was common. PCBs in electrical equipment are controlled by 40 CFR, Part 761. According to this regulation there are three categories for classifying electrical equipment: less than 50 ppm of PCBs is considered “Non-PCB”; between 50 and 500 ppm is considered “PCB-Contaminated”; and greater than 500 ppm is considered “PCB”. Transformers were observed inside the right- of-way. There are 3 pole mounted transformers in good condition that were observed during the field investigation.
- 9) *Stained Soil or Pavement:* No areas of stained soil were observed on the property. No areas of stained pavement were observed on the property.

- 10) *Stressed Vegetation:* No areas of stressed vegetation were observed on the property.
- 11) *Solid Waste:* Minimal roadway litter was observed on the alignment; however, no staining of soils, no sheen on liquids, and no stressed vegetation was observed. Although the waste should be disposed of properly, it is unlikely that hazardous substances or petroleum products have been released, and is therefore not considered to be a recognized environmental condition.
- 12) *Waste Water:* There was no waste water or other liquids being discharged into a drain, ditch, underground injection system, or stream on or adjacent to the property.
- 13) *Wells:* No wells were observed on the property.
- 14) *Septic Systems:* No septic systems or cesspools were observed on the property.

VII) INTERVIEWS

The purpose of interviewing is to obtain information indicating recognized environmental conditions in connection with the property. Copies of the interview documentation can be found in Appendix VI.

A) INTERVIEWS WITH PAST AND PRESENT OWNERS AND OCCUPANTS

Date	Name	Status	Organization
January 12, 2011	Henry Phillips	Environmental Project Manager	SCDOT

B) INTERVIEWS WITH STATE AND/OR LOCAL GOVERNMENT OFFICIALS

Date	Name	Title	Organization
January 12, 2011	Phil Elliot	Deputy Chief	Camden Fire Department
September 29, 2011	Brian Motley	ARME	SCDOT

VIII) LIMITATIONS & EXCEPTIONS OF ASSESSMENT

The conclusions presented in this report are professional opinions developed from the information gathered relative to the subject property as outlined in the report and interpretation of that information. HGBD warrants that the findings, recommendations, and professional advice contained herein represent good commercial and customary practice for conducting an environmental assessment. HGBD does not warrant the accuracy or completeness of the information provided by outside sources referenced in this report. Additionally, if potentially environmentally significant information becomes available subsequent to the submittal of this report, HGBD reserves the right to amend the conclusions as presented herein.

This study is not intended to be an exhaustive investigation of specific contamination at the subject property, but rather provide an overview of information or recognized environmental conditions, or the potential for contamination at the subject site and adjacent properties.

Conclusions presented apply to the site conditions observed at the time of the investigation and those which may potentially impact the site in the future. The conclusions are not applicable to changes occurring after the investigation has been completed and of which HGBD is not aware and cannot evaluate. No other warranties are implied or expressed.

IX) FINDINGS AND CONCLUSIONS

We have performed a Phase I ESA in conformance with the scope and limitations of ASTM E1527-05 of an approximately 1.6 mile corridor along S-130 (Boykin Road) located in Camden, South Carolina. Any exceptions to, or deletions from, this practice are described in Section VIII of this report. The methods employed for this Phase I ESA included examination of available background materials, file review, interviews, and field inspections. There were no data gaps that significantly affected our ability to identify recognized environmental conditions associated with the property. **This assessment has not revealed apparent evidence of underground storage tanks, recognized environmental conditions, historical recognized environmental conditions, or de minimis conditions on the subject property.**

XI) BENEFICIARY

This report, and all work associated with this report, is for the sole use of the beneficiary and will not be transferred to any party other than the beneficiaries named as follows:

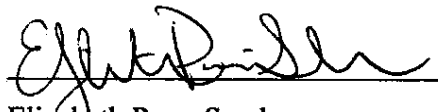

South Carolina Department of Transportation
955 Park Street
Columbia, SC 29201

Reliance on the information and conclusions in this report by any other person or entity is not authorized without the written consent of HGBD Environmental, Inc.

XII) SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in of 40 CFR §312.40. We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312. Please refer to Appendix VII.

Notice of Disclaimer

Due to the limitations, constraints, and inaccuracies and incompleteness of government information and computer mapping data currently available to FirstSearch Technology Corp., certain conventions have been utilized in preparing the locations of all federal, state and local agency sites residing in FirstSearch Technology Corp.'s databases. All EPA NPL and state landfill sites are depicted by a rectangle approximating their location and size. The boundaries of the rectangles represent the eastern and western most longitudes; the northern and southern most latitudes. As such, the mapped areas may exceed the actual areas and do not represent the actual boundaries of these properties. All other sites are depicted by a point representing their approximate address location and make no attempt to represent the actual areas of the associated property. Actual boundaries and locations of individual properties can be found in the files residing at the agency responsible for such information.

Waiver of Liability

Although FirstSearch Technology Corp. uses its best efforts to research the actual location of each site, FirstSearch Technology Corp. does not and can not warrant the accuracy of these sites with regard to exact location and size. All authorized users of FirstSearch Technology Corp.'s services proceeding are signifying an understanding of FirstSearch Technology Corp.'s searching and mapping conventions, and agree to waive any and all liability claims associated with search and map results showing incomplete and or inaccurate site locations.

Environmental First Search Descriptions

NPL: EPA NATIONAL PRIORITY LIST - The National Priorities List is a list of the worst hazardous waste sites that have been identified by Superfund. Sites are only put on the list after they have been scored using the Hazard Ranking System (HRS), and have been subjected to public comment. Any site on the NPL is eligible for cleanup using Superfund Trust money. A Superfund site is any land in the United States that has been contaminated by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.**FINAL** - Currently on the Final NPL**PROPOSED** - Proposed for NPL

NPL DELISTED: EPA NATIONAL PRIORITY LIST Subset - Database of delisted NPL sites. The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.**DELISTED** - Deleted from the Final NPL

CERCLIS: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM (CERCLIS)- CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL.**PART OF NPL**- Site is part of NPL site**DELETED** - Deleted from the Final NPL**FINAL** - Currently on the Final NPL**NOT PROPOSED** - Not on the NPL**NOT VALID** - Not Valid Site or Incident**PROPOSED** - Proposed for NPL**REMOVED** - Removed from Proposed NPL**SCAN PLAN** - Pre-proposal Site**WITHDRAWN** - Withdrawn

NFRAP: EPA COMPREHENSIVE ENVIRONMENTAL RESPONSE COMPENSATION AND LIABILITY INFORMATION SYSTEM ARCHIVED SITES - database of Archive designated CERCLA sites that, to the best of EPA's knowledge, assessment has been completed and has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.**NFRAP** – No Further Remedial Action Plan**P** - Site is part of NPL site**D** - Deleted from the Final NPL**F** - Currently on the Final NPL**N** - Not on the NPL**O** - Not Valid Site or Incident**P** - Proposed for NPL**R** - Removed from Proposed NPL**S** - Pre-proposal Site**W** – Withdrawn

RCRA COR ACT: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984.**RCRAInfo** facilities that have reported violations and subject to corrective actions.

RCRA TSD: EPA RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM TREATMENT, STORAGE, and DISPOSAL FACILITIES. - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are

required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that treat, store, dispose, or incinerate hazardous waste.

RCRA GEN: EPA/MA DEP/CT DEP RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM GENERATORS - Database of hazardous waste information contained in the Resource Conservation and Recovery Act Information (RCRAInfo), a national program management and inventory system about hazardous waste handlers. In general, all generators, transporters, treaters, storers, and disposers of hazardous waste are required to provide information about their activities to state environmental agencies. These agencies, in turn pass on the information to regional and national EPA offices. This regulation is governed by the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments of 1984. Facilities that generate or transport hazardous waste or meet other RCRA requirements. **LGN** - Large Quantity Generators **SGN** - Small Quantity Generators **VGN** - Conditionally Exempt Generator. Included are **RAATS** (RCRA Administrative Action Tracking System) and **CMEL** (Compliance Monitoring & Enforcement List) facilities. **CONNECTICUT HAZARDOUS WASTE MANIFEST** - Database of all shipments of hazardous waste within, into or from Connecticut. The data includes date of shipment, transporter and TSD info, and material shipped and quantity. This data is appended to the details of existing generator records. **MASSACHUSETTES HAZARDOUS WASTE GENERATOR** - database of generators that are regulated under the MA DEP. **VQN-MA** = generates less than 220 pounds or 27 gallons per month of hazardous waste or waste oil. **SQLN-MA** = generates 220 to 2,200 pounds or 27 to 270 gallons per month of waste oil. **LQG-MA** = generates greater than 2,200 lbs of hazardous waste or waste oil per month.

Fed Brownfield: EPA BROWNFIELD MANAGEMENT SYSTEM (BMS) - database designed to assist EPA in collecting, tracking, and updating information, as well as reporting on the major activities and accomplishments of the various Brownfield grant Programs. **CLEANUPS IN MY COMMUNITY** (subset) - Sites, facilities and properties that have been contaminated by hazardous materials and are being, or have been, cleaned up under EPA's brownfield's program.

ERNS: EPA/NRC EMERGENCY RESPONSE NOTIFICATION SYSTEM (ERNS) - Database of incidents reported to the National Response Center. These incidents include chemical spills, accidents involving chemicals (such as fires or explosions), oil spills, transportation accidents that involve oil or chemicals, releases of radioactive materials, sightings of oil sheens on bodies of water, terrorist incidents involving chemicals, incidents where illegally dumped chemicals have been found, and drills intended to prepare responders to handle these kinds of incidents. Data since January 2001 has been received from the National Response System database as the EPA no longer maintains this data.

Tribal Lands: DOI/BIA INDIAN LANDS OF THE UNITED STATES - Database of areas with boundaries established by treaty, statute, and (or) executive or court order, recognized by the Federal Government as territory in which American Indian tribes have primary governmental authority. The Indian Lands of the United States map layer shows areas of 640 acres or more, administered by the Bureau of Indian Affairs. Included are Federally-administered lands within a reservation which may or may not be considered part of the reservation. **BUREAU OF INDIAN AFFAIRS CONTACT** - Regional contact information for the Bureau of Indian Affairs offices.

State/Tribal Sites: SCDHEC CERCLA (SUPERFUND LISTING) - database that is closely associated with EPA's CERCLIS list and identifies facilities and/or locations that South Carolina has recognized with potential or existing

environmental contamination. Included within the South Carolina Sites List report is the federal, state or local agency which has primary responsibility for the site assessment and the remedial activities, the project manager, and the support agency.

State Spills 90: SCDHEC SPILLS LIST - database of spills that have been reported to the South Carolina Department of Health and Environmental Control. The data includes occurred date, responsible party data and media affected.

State/Tribal SWL: SCDHEC SOILD WASTE FACILITIES LIST - database concerned with the handling of solid waste and includes locations identified with solid waste landfilling or associated activities involving the handling of solid waste. The presence of a site on this list does not necessarily indicate existing environmental contamination but rather the potential. Included in this database are the following types of permitted sites/facilities: ASSIGN TYPE

DESCRIPTION ASH	ASH MONOFILL LANDFILLS CDL	C&D AND LAND-
CLEARING DEBRIS LANDFILLS - PART IIICIW	CELLULOSIC & INERT WASTE ONLYCLO	
CLOSEDCWC	COMPOSTING & WOOD CHIPPING/SHREDDING FACILITYC&D

PERMITSLCD	LAND-CLEARING DEBRIS & YARD TRASHMSW	MUNICIPAL
SOLID WASTE LANDFILLSNO	NEVER OPENEDSDG	SLUDGE MONOFILL
PERMITSOIL	USED OIL PROCESSING FACILITYTIR	WASTE TIRE FACILITY

State/Tribal LUST: SCDHEC CONFIRMED RELEASE REPORT - database of petroleum storage systems that have reported a leaking underground storage tank. The data includes facilities and/or locations that have confirmed releases.

State/Tribal UST/AST: SCDHEC UNDERGROUND STORAGE TANK LISTING(COMPREHENSIVE) - database of registered underground stationary petroleum storage tanks. Inclusion on this list indicates the presence of stationary petroleum storage tanks and, therefore, the potential for environmental problems. It does not necessarily indicate existing problems.

State/Tribal EC: SCDHEC PUBLIC RECORD(SUBSET) - A database of Land Use Controls consisting of all eligible response sites' activities that: 1) Occurred between July 1, 2005 - June 30, 2006; 2) Were completed between July 1, 2005 - June 30, 2006; 3) Are anticipated to have work performed on them between July 1, 2006 - June 30, 2007. Eligible response sites include Voluntary Cleanup Program Sites, Brownfield Sites, State Superfund Sites, State Consent Agreement Sites, State Consent Order Sites, Dry-cleaning Sites, Certain Regulated Underground Storage Tanks (USTs) and Formerly Used Defense Sites.

State/Tribal IC: SCDHEC PUBLIC RECORD(SUBSET) - A database of Land Use Controls consisting of all eligible response sites' activities that: 1) Occurred between July 1, 2005 - June 30, 2006; 2) Were completed between July 1, 2005 - June 30, 2006; 3) Are anticipated to have work performed on them between July 1, 2006 - June 30, 2007. Eligible response sites include Voluntary Cleanup Program Sites, Brownfield Sites, State Superfund Sites, State Consent Agreement Sites, State Consent Order Sites, Dry-cleaning Sites, Certain Regulated Underground Storage Tanks (USTs) and Formerly Used Defense Sites.

State/Tribal Brownfields: SCDHEC PUBLIC RECORD(SUBSET) - A database consisting of all eligible response sites'(Brownfield's) activities that: 1) Occurred between July 1, 2005 - June 30, 2006; 2) Were completed between July 1,

2005 - June 30, 2006; 3) Are anticipated to have work performed on them between July 1, 2006 - June 30, 2007.

Federal IC / EC: EPA FEDERAL ENGINEERING AND INSTITUTIONAL CONTROLS- Superfund sites that have either an engineering or an institutional control. The data includes the control and the media contaminated. RESOURCE CONSERVATION AND RECOVERY INFORMATION SYSTEM SITES (RCRA) – RCRA site the have institutional controls.

 No further coverage available

GLOSSARY OF TERMS

“No Listing/Not Listed” - address not listed in the directory

“Vacant” or “No Current Listing” - status of address in directory

“Residential Listing” - one residential listing located at address

“Multiple Residential Listings” - more than one residential listing located at address

“Multiple Retail Listings” - more than one retail facility located at address

“Multiple Business Listings” - more than one business listing at address

“Multiple Government Offices” - more than one federal listing at an address

“Multiple Municipal Listings” - more than one municipal listing at an address

“Multiple Military Listings” - more than one military listing at an address

“Street Not Listed” - street not listed in directory

When multiple tenants/facilities are observed for one address, the information may be summarized as shown in the following examples:

- An apartment building will be represented by “Multiple Residential Listings”
- A retail shopping center will be represented by “Multiple Retail Listings” followed by a separate listing of sites, if present, which may contain the use of regulated/chemical/hazardous materials such as dry cleaners, photo finishers, hair salons, auto repair shops, etc.
- An office building consisting of attorneys, insurance, firms, or other facilities which do not indicate the use of regulated/chemical/hazardous materials will be represented by “Multiple Business Listings”

Residential addresses, including individual houses and apartment buildings, are listed as residential. Names of tenants can be provided if needed.

Unless otherwise noted, the subject address(es) plus four adjacent addresses up from the subject property and four addresses down from the subject property are included in the report, if available.

Although great care has been taken by FirstSearch Technology Corporation in compiling and verifying the information contained in this report to insure that it is accurate, FirstSearch Technology Corporation disclaims any and all liability for any errors, omissions, or inaccuracies in such information and data.

Definitions of FEMA Flood Zone Designations

Flood zones are geographic areas that the FEMA has defined according to varying levels of flood risk. These zones are depicted on a community's Flood Insurance Rate Map (FIRM) or Flood Hazard Boundary Map. Each zone reflects the severity or type of flooding in the area.

Moderate to Low Risk Areas

In communities that participate in the NFIP, flood insurance is available to all property owners and renters in these zones:

ZONE	DESCRIPTION
B and X (shaded)	Area of moderate flood hazard, usually the area between the limits of the 100-year and 500-year floods. B Zones are also used to designate base floodplains of lesser hazards, such as areas protected by levees from 100-year flood, or shallow flooding areas with average depths of less than one foot or drainage areas less than 1 square mile.
C and X (unshaded)	Area of minimal flood hazard, usually depicted on FIRMs as above the 500-year flood level. Zone C may have ponding and local drainage problems that don't warrant a detailed study or designation as base floodplain. Zone X is the area determined to be outside the 500-year flood and protected by levee from 100-year flood.

High Risk Areas

In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all of these zones:

ZONE	DESCRIPTION
A	Areas with a 1% annual chance of flooding and a 26% chance of flooding over the life of a 30-year mortgage. Because detailed analyses are not performed for such areas; no depths or base flood elevations are shown within these zones.
AE	The base floodplain where base flood elevations are provided. AE Zones are now used on new format FIRMs instead of A1-A30 Zones.
A1-30	These are known as numbered A Zones (e.g., A7 or A14). This is the base floodplain where the FIRM shows a BFE (old format).
AH	Areas with a 1% annual chance of shallow flooding, usually in the form of a pond, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.
AO	River or stream flood hazard areas, and areas with a 1% or greater chance of shallow flooding each year, usually in the form of sheet flow, with an average depth ranging from 1 to 3 feet. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Average flood depths derived from detailed analyses are shown within these zones.
AR	Areas with a temporarily increased flood risk due to the building or restoration of a flood control system (such as a levee or a dam). Mandatory flood insurance purchase requirements will apply, but rates will not exceed the rates for unnumbered A zones if the structure is built or restored in compliance with Zone AR floodplain management regulations.
A99	Areas with a 1% annual chance of flooding that will be protected by a Federal flood control system where construction has reached specified legal requirements. No depths or base flood elevations are shown within these zones.

High Risk - Coastal Areas

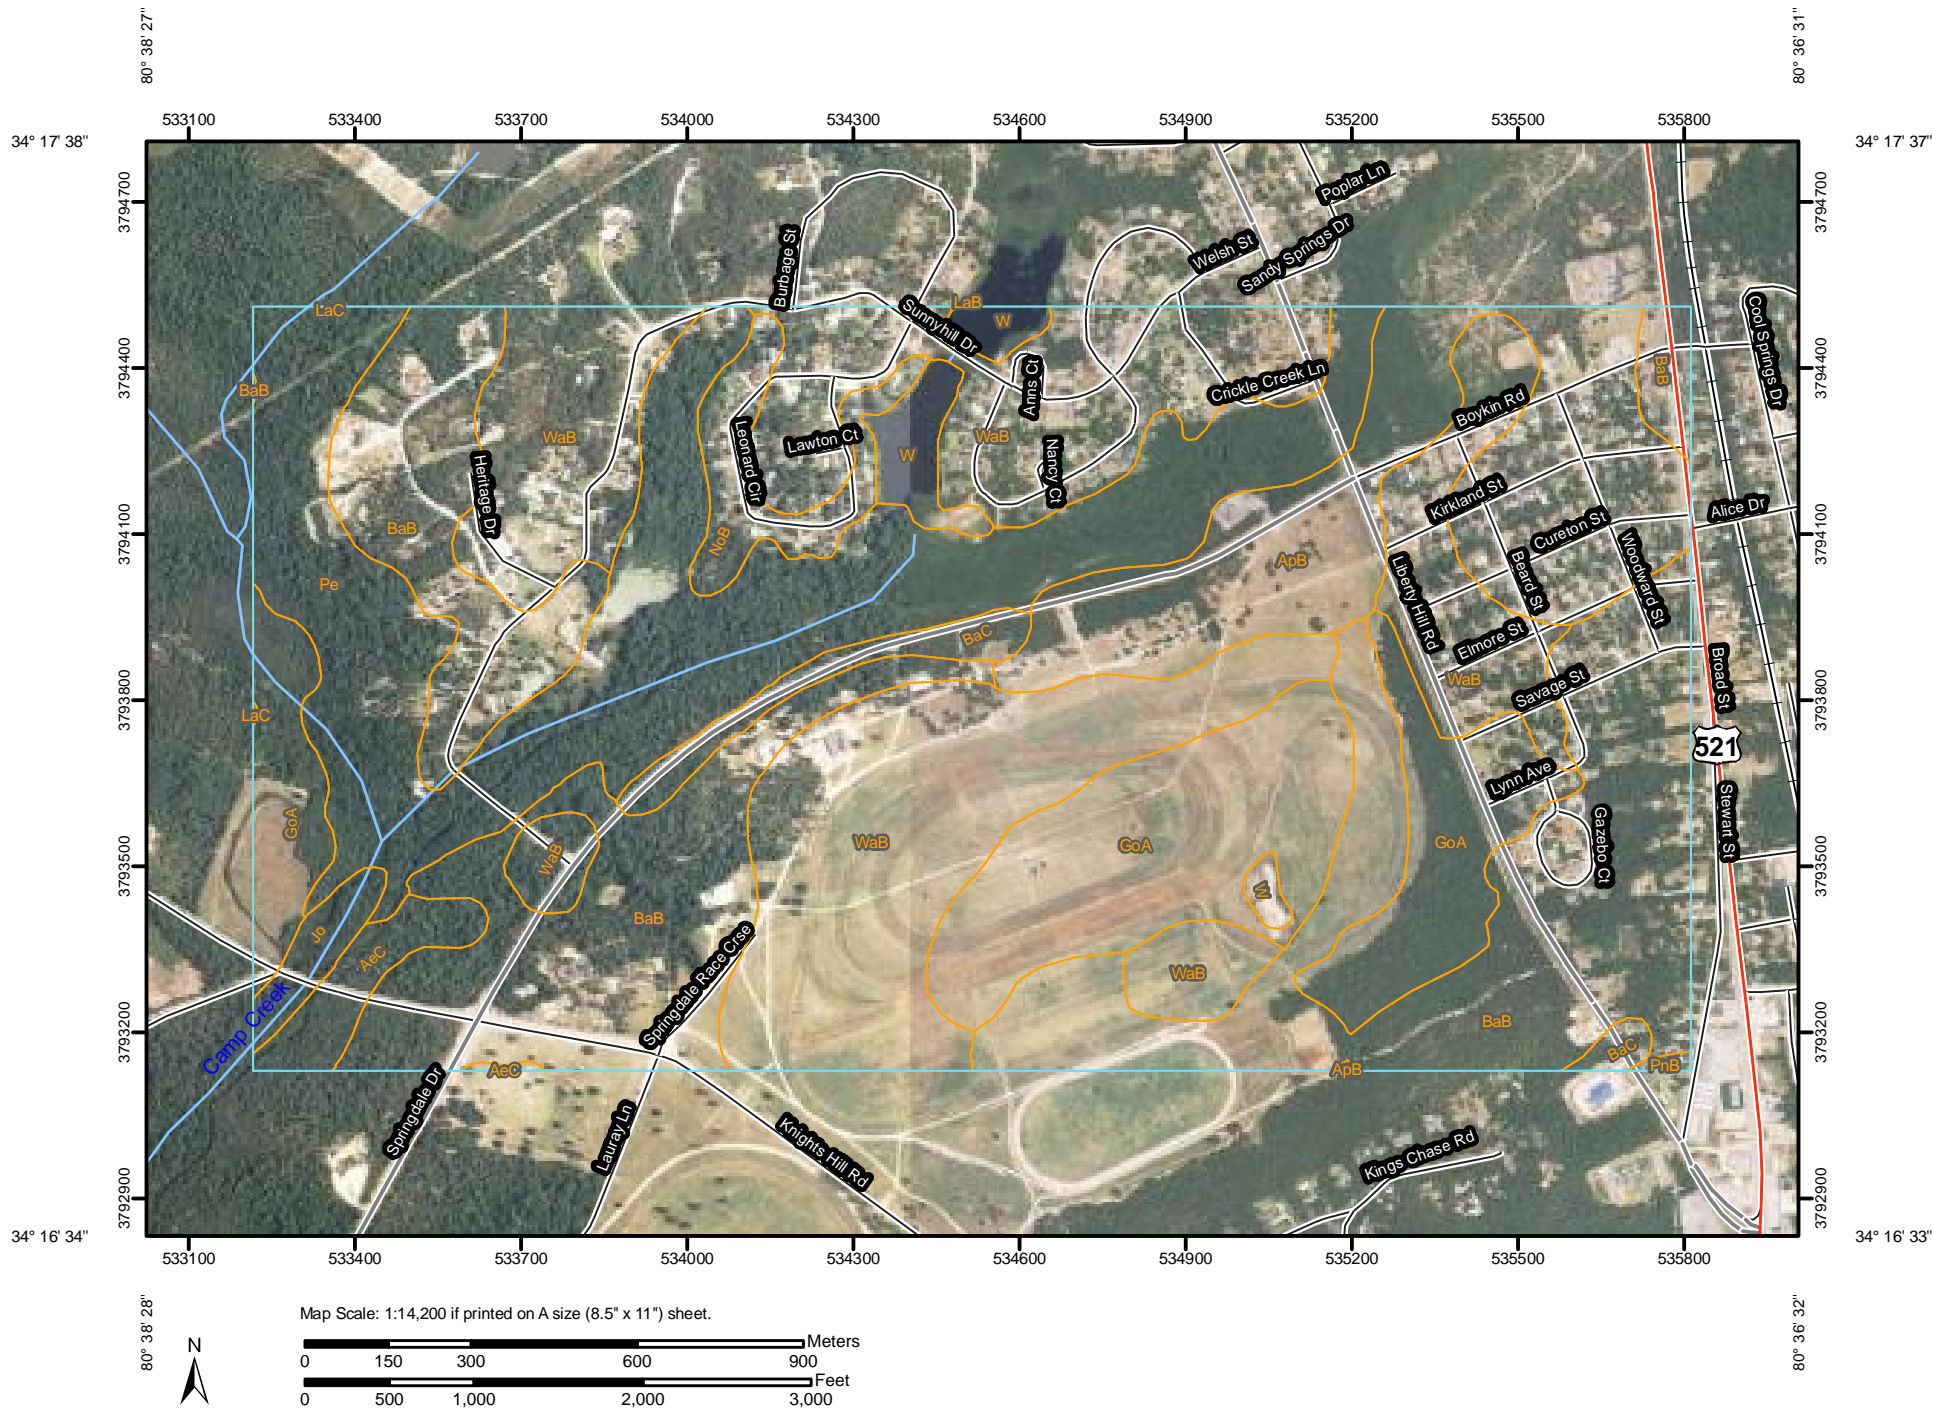

In communities that participate in the NFIP, mandatory flood insurance purchase requirements apply to all of these zones:

ZONE	DESCRIPTION
V	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. No base flood elevations are shown within these zones.
VE, V1 - 30	Coastal areas with a 1% or greater chance of flooding and an additional hazard associated with storm waves. These areas have a 26% chance of flooding over the life of a 30-year mortgage. Base flood elevations derived from detailed analyses are shown at selected intervals within these zones.

Undetermined Risk Areas

ZONE	DESCRIPTION
D	Areas with possible but undetermined flood hazards. No flood hazard analysis has been conducted. Flood insurance rates are commensurate with the uncertainty of the flood risk.

Kershaw County Area, South Carolina

ApB—Alpin sand, 0 to 6 percent slopes

Map Unit Setting

Elevation: 50 to 300 feet

Mean annual precipitation: 45 to 60 inches

Mean annual air temperature: 63 to 72 degrees F

Frost-free period: 240 to 310 days

Map Unit Composition

Alpin and similar soils: 100 percent

Description of Alpin

Setting

Landform: Marine terraces

Landform position (two-dimensional): Summit

Landform position (three-dimensional): Interfluve

Down-slope shape: Convex

Across-slope shape: Convex

Parent material: Sandy marine deposits

Properties and qualities

Slope: 0 to 6 percent

Depth to restrictive feature: More than 80 inches

Drainage class: Excessively drained

Capacity of the most limiting layer to transmit water (Ksat): High (1.98 to 5.95 in/hr)

Depth to water table: More than 80 inches

Frequency of flooding: None

Frequency of ponding: None

Available water capacity: Low (about 3.7 inches)

Interpretive groups

Land capability (nonirrigated): 4s

Typical profile

0 to 5 inches: Sand

5 to 14 inches: Sand

14 to 63 inches: Sand

63 to 85 inches: Sand

APPENDIX VI

INTERVIEWS

Interview Log

09/29/11 – Brian Motley, Assistant Resident Maintenance Engineer (Kershaw County), SCDOT

Subject Corridor: S-130/Boykin Road ROW between US 521/US 601/N Broad Street and Knights Hill Road.

Purpose: A Phase I Environmental Assessment is being conducted on the subject property at the request of the SCDOT. The following information is requested in order to evaluate the potential for petroleum or hazardous material contamination at the subject site. Please provide honest answers to the best of your ability. Thank you for your cooperation.

- Are you aware of any chemicals stored or spilled within the subject corridor?
No.
- Are you aware of any environmental cleanups conducted within the subject corridor?
No.
- Do you have any specialized knowledge of the site and surroundings? **No.** Does your knowledge give you reason to suspect any environmental concerns? **No.**
- Do you have any other knowledge that would be pertinent to the environmental professional? **No concerns in this area.**

Interview Log

01/12/11 – Henry Phillips, Environmental Project Manager, SCDOT

Subject Corridor: S-130/Boykin Road ROW between US 521/US 601/N Broad Street and Knights Hill Road.

Purpose: A Phase I Environmental Assessment is being conducted on the subject property at the request of the SCDOT. The following information is requested in order to evaluate the potential for petroleum or hazardous material contamination at the subject site. Please provide honest answers to the best of your ability. Thank you for your cooperation.

- Are you aware of any environmental cleanup liens within the subject corridor?
No
- Are you aware of any AUL's such as engineering controls, land use restrictions, or institutional controls within the subject corridor?
No
- Are you aware of past uses within the subject corridor? If so, what are they?
No
- Are you aware of any chemicals stored or spilled within the subject corridor?
No
- Are you aware of any environmental cleanups conducted within the subject corridor?
No
- Do you have any specialized knowledge of the site and surroundings? Does your knowledge give you reason to suspect any environmental concerns?
No
- Do you have any other knowledge that would be pertinent to the environmental professional? **All information available to SCDOT regarding the environmental status of the project corridor is contained in the Advanced Project Planning Report, dated February 2009.**

Interview Log

01/12/11 – Phil Elliot, Deputy Chief, Camden Fire Department

Subject Corridor: S-130/Boykin Road ROW between US 521/US 601/N Broad Street and Knights Hill Road.

Purpose: A Phase I Environmental Assessment is being conducted on the subject property at the request of the SCDOT. The following information is requested in order to evaluate the potential for petroleum or hazardous material contamination at the subject site. Please provide honest answers to the best of your ability. Thank you for your cooperation.

- Are you aware of any chemicals stored or spilled within the subject corridor?
No.
- Are you aware of any environmental cleanups conducted within the subject corridor?
No. No emergency spill responses to this area.
- Do you have any specialized knowledge of the site and surroundings? **Yes. Resident for over 50 years.** Does your knowledge give you reason to suspect any environmental concerns? **No.**
- Do you have any other knowledge that would be pertinent to the environmental professional? **No.**

APPENDIX VII

QUALIFICATIONS OF ENVIRONMENTAL

PROFESSIONALS

Elizabeth Penn-Sanders Environmental Technician

Ms. Penn-Sanders joined HGBD in 2009. She has worked in several areas in our environmental department and with the civil department. She is currently working on environmental projects including NEPA documentation, phase I environmental site assessments, landfill permitting, geotechnical investigations, and hydraulic studies.

Ms. Penn-Sanders has worked on National Environmental Protection Act (NEPA) Environmental Assessment and Categorical Exclusion documents for highway development projects in Georgia and South Carolina. Responsibilities include coordinating with regulatory agencies, preparing public meeting materials, and document review and preparation.

Ms. Penn-Sanders has experience with performing Phase I and Phase II Environmental Site Assessments in residential, commercial, and industrial settings. Phase I skills include site inspection, regulatory search, historical review and report preparation. In addition, she has also carried out sampling plans for various Phase II projects with knowledge of both soil and water matrix sampling methods according to Environmental Protection Agency Standard Operation Procedures.

Ms. Penn-Sanders has worked with the Georgia Underground Storage Tank (UST) program and has participated in the preparation of UST closure reports, Site Investigation Plans, and Corrective Action Plans (Part A & Part B).

Ms. Penn-Sanders has prepared bridge hydraulic study reports which involve creating a model for natural, existing and proposed bridges using HEC-RAS.

Ms. Penn-Sanders is familiar with the site suitability and permitting process for Subtitle D landfills and has participated in the preparation of a Site Acceptability Study.

Ms. Penn-Sanders relevant experience includes the following:

NEPA Projects:

- SCDOT, SC-7 Bridge Replacement
NEPA Environmental Assessment
North Charleston, South Carolina
- Widening & Reconstruction of Gwinnett Street
NEPA Categorical Exclusion
Chatham County, Georgia

Environmental:

- Dean Forest Road Landfill
Western Cells Site Acceptability Study
Savannah, Georgia
- Liberty County Career Academy
Phase I ESA
Hinesville, Georgia

Education:

Bachelor of Science in Civil and
Environmental Engineering /
2011 (expected)

Affiliations:

ASCE The Citadel Student
Chapter, Society of Women
Engineers, Charleston Engineers
Joint Council (CEJC) Scholarship
Award Recipient, ASCE The South
Carolina Section Service Award
Recipient 2008-2009

- SCDOT, SC-7 Bridge Replacement
Phase I ESA
North Charleston, South Carolina
- Savannah Quarters, Tract 11 and 13
Phase I ESA
Pooler, Georgia
- Hunter Army Airfield, Lotts Island
Phase I ESA
Savannah, GA

Geotechnical:

- Dillon Sugar Hill WWTP Sprayfield
Site Investigation
Dillon, South Carolina
- World War II Memorial
Geotechnical Investigation
Savannah, Georgia
- Dining Facility 4
Geotechnical Investigation
Ft. Benning, Columbus, Georgia
- SCDOT, SC-7 Bridge Replacement
Preliminary Geotechnical Investigation
North Charleston, South Carolina

Hydrology:

- MODOT, Bridge Replacements
Bridge Hydrology Studies
Missouri
- SC-24 Paper Mill Road
Bridge Hydrology Study
South Carolina

John Eden, PE, LEED AP Environmental Engineer

Mr. Eden is a staff engineer with Hussey, Gay, Bell & DeYoung Environmental, Inc. and a graduate of the Mercer University School of Engineering. Mr. Eden has varied experience in environmental compliance, sampling, design, and permitting. Some of his current responsibilities include conducting environmental & geotechnical investigations, subcontractor coordination, quality assurance, and technical communications.

He has experience with performing Phase I and Phase II Environmental Site Assessments in residential, commercial, and industrial settings. Phase I skills include site inspection, regulatory search, historical review and report preparation. In addition, he has also carried out sampling plans for various Phase II projects with knowledge of both soil and water matrix sampling methods according to Environmental Protection Agency Standard Operation Procedures.

Mr. Eden is a LEED Accredited Professional and is familiar with the LEED rating system as well as general sustainable design & development principles. He has worked on both National Environmental Protection Act (NEPA) and Georgia Environmental Protection Act (GEPA) Environmental Assessment documents for highway development projects. Mr. Eden has served as the Quality Assurance (QA) representative on such projects as landfill closures and at various geotechnical subsurface investigations. QA responsibilities have included documentation of daily progress, inspection of the work, technical advising, regulatory interpretation and report preparation.

Mr. Eden has prepared National Pollution Discharge Elimination System (NPDES) permits for construction in order to minimize erosion and client expenditures. Mr. Eden has prepared Spill Prevention Control and Countermeasure (SPCC) plans for facilities with scattered oil storage and no previous spill prevention measures in place and has been trained in site safety and emergency response. Mr. Eden is familiar with the site suitability and permitting process for Subtitle D landfills and specializes in working with regulators and responding to comments to streamline the permitting process. In addition, he has extensive field experience including soil and groundwater sampling, boring location, supervision of geotechnical borings and installation of monitoring wells.

The following is a list of Mr. Eden's relevant projects:

Environmental:

- Dean Forest Road Landfill
HSRA Waste Relocation
Savannah, Georgia
- Delta Metals
Waste Delineation
Savannah, Georgia
- Competitive Power Ventures
Phase II ESA
Savannah, Georgia

Education:

Bachelor of Science in Environmental Engineering / Mercer University / 2000
OSHA 40 Hour Hazardous Waste Operations & Emergency Response Training

Registrations:

Registered Professional Engineer
State of Georgia / No. 031234
LEED Accredited Professional

Affiliations:

Tau Beta Pi, National Engineering Honor Society
Phi Kappa Phi, National Academic Honor Society

- Dillon Sugar Hill WWTP Expansion
Phase I ESA
Dillon, South Carolina
- Maple Swamp Force Main
Phase I ESA
Dillon, South Carolina
- Charleston Wastewater Tunnel Replacement Project
Phase II Environmental Site Assessments for Commissioners of Public Works
City of Charleston, South Carolina
- Town of Lane Sanitary Sewer Lift Station Sites #1-#4
Phase I ESA, Limited Phase II ESA
Lane, South Carolina
- Global Shipping Systems
Limited Phase II ESA
Lane, South Carolina
- Nash Finch / T.J. Morris
CAP-A
Statesboro, Georgia
- Georgia Southern University
Spill Prevention Control and Countermeasure (SPCC) Plan
Statesboro, Georgia
- Genesis Point
Phase I ESA for 2,230-acre subdivision
Bryan County, Georgia
- Savannah Quarters
Phase I ESA for 2,500-acre subdivision & golf courses
Savannah, Georgia

Transportation:

- Tybrisa Streetscape Enhancements – Categorical Exclusion
Transportation Enhancement Project
Tybee Island, Georgia
- Tybee Sidewalks – Categorical Exclusion
Transportation Enhancement Project
Tybee Island, Georgia
- Pooler Sidewalks – Categorical Exclusion
Transportation Enhancement Project
Pooler, Georgia
